Caused by auto update. I will lock out clients before they get these errors.. once I enable a new version, older versions become invalid and have to be removed or they do exactly this..

drkhazeAnother bug:

I was playing in a renguard server a few minutes ago, the map was volcano. I saw an empty hummvee in the field. I got into it, spun the turret around then got booted from the game for cheating. Of course, I wasn't. Here's the messages in the tab:

So, it seems like a series of errors. Some sort of vehicle bug that caused the corruptions? Who knows.
