majikentxC4pRoX maybe these so called "alarms" were produced since I told spoony why I couldn't log into renegade. He told me to restart it a couple of times, and I must have restarted it at least 30 times within 1 minute?

Or you client was altered, which is why it set off that type of alarm. I reset several times in 1 minute and, yet, I'm still a part of the network. You're not. Wonder why....

this is fucking amazing, I was one of the people that when they heard renguard was out, became happy and thought "yes good job crimson." And now my renegade's fucked up for trying to get it to work. Nice, really nice :rolleyes:
