Technically there is NO language filter. All BR can offer is a warning and/or kick on language. But we can't prevent it from being shown at all. We were pretty close to getting the ability to do that but our contact with Westwood didn't have the time to implement it.

Note: BR only works with the Free Dedicated Server (FDS) which can be downloaded off the Westwood FTP (<ftp://ftp.westwood.com/>) -- navigate to Renegade...

You can't switch from dedicated to non-dedicated without stopping the server. If you find yourself wanting to play once in a while, you might consider running the server on another computer and playing on your main computer... that's how mine works.
