Subject: People are kicked although they are running RG
Posted by gibberish on Fri, 09 Apr 2004 22:03:18 GMT

CwazyapeAlso, if you are on the same network with the server you will need to add you name to the ssc_ignore.txt

This is the case, in my case

However people were getting booted who were joining from the outside too.
Will a Natting firewall have any effect?

I also noticed a small bug with the scc_ignore code.
If a player is in scc_ignore.txt and joins the server before renguard starts they are not ignored so a couple of games later they get booted.

Could one of the renguard team join my server to verify if things are working right:

Game Name: [RG] LA Game ......

Its top of the list when sorted by Ping on WOL.

Thanks,
Gib
