I love to loose. It is my way of life. My team has lost nearly all the times I played. Maybe 3-5 wins out of them all. Therefor my tactics reflect losing.

Losing tactics part one:

Cheap chracters almost all game.

Chaingun down everything that turns your curosr red.

Forget kills, weakened troops/tanks die faster at your teammates' hands.

When lag is bad stare at an MCT with repair gun.

Tanks are for people who can multi-task.

Fun is fun where-ever you rank in a game.

Give your teammates as much recon as they can ignore.
