C4minerMake a script that closes Renguard automatically after you quit Renegade. I don't want Renguard running all the time in the event that I forget to close it myself.

Thanks.

Yeah or don't make the error message saying "Renguard is already running." Just make it do an auto shutdown and reload Renguard rather than having to close it manually. Most of us have grown to click on the Renegade Icon on the Desktop or wherever, not the already running programs in the bottom right hand corner.

Good luck with the updates, I hope it gets rid of the bugs.
