To see how someone is using it, type the fps command and if the fps goes down to like 0-10, someone is using it. I tested it out but never told anyone that. oh btw, Slashx87, Havoc7987, Cloudie86, KeybladeX, and some other names are only one person: me. those names aren't separate people so you guys dont have to worry about people using the cheat, I have only explained it once and that was on the DG forums...
