<http://www.ea.com> go to Technical Support and fill in the categorys, C&C >Renegade etc etc...

Look for the topic there. If nothing is there to help you then cocontacts an EA Staff and talk to one personally. <http://www.ea.com> Tech Support and and click "Ask a Question" explina what your problem is and thne attach those screenshots. EA Technical support is very useful and has alays worked for me in the past when you talk to one personally. I think I'm a bit late posting this but if not, good luck!
