Subject: Problems with Renguard
Posted by matze4444 on Thu, 15 Apr 2004 12:59:04 GMT

Sorry my english is not so good but i try it:

I have installed renguard. First I can't play renegade with the old butten. then i found the button game2. So I played with this button. But now if i get into any server, the server would kick me after a few seconds with this information:
You was kick out of the server because one of the following 2 soil:
-the server was shut down or the connection was broken.

Server wurde heruntergefahren oder die Verbindung unterbrochen)

And that happend by the servers which are connect with renguard. Why? What have I done or not done? Please help me. thanks
