I bought the 9600XT after burning up my 9800XT and Best Buy not replacing it because they called it "Abuse" and the girl was so condising to my dad that he got the manager and she was fired on the spot. But the tech dude still called it abuse. I think the 9600XT is a better deal no game needs the 9800XT yet and you will be just fine with the 9600XT.
