Okay I am looking into this. So far I can tell you that nobody named ohyes* or even *yes* has logged into any RG-enabled servers. I will speak to the admin of Renstation and get him to check his logfiles. Can you tell me exactly what day and about what time this happened?

Note that we have tested wallhacks and they cannot shoot through anything that is a model (PTS, vehicles, etc), nor can models (tank shells) go through anything and do damage.
