---

Best card NVidia Geforce FX 6800, its almost 2x as fast as any radeon ore geforce Atm.Its has got a big pricetag on it though and it needs more power.

Good alround cards are: radeon 9600,Gefore fx 5900Xt.And ti 4200 Good price and still nice performance.

Personnaly i'd go with Nvidia cuz i always had it and never problems with it but thats just me
