ZiasodZiasodhow do i install this no cd patch

can i just put it over game.exe or game2.exe after installing renguard?

i got it working i had at first a message puth in the cd or something i pressed cancel and game just
started instead of exited now i entered a server at gsa and it didn't ask any thing screw virtual shit
(still will download it)

this gay now i get an blody error when starting it
u should work on users friendly like when u leave server u don't have to exit renguard ect this
anoying if it even works
