I found this program online and it is really cool. It lets you make your own music by piecing together pre-made sound sequences.

http://www.2flashgames.com/f/f-548.htm

I recommend trying it out. If you make a good song, post the string here so we can load it on our computers and listen to it also, then rate it.

To post the string, click on Save then highlight and copy all the dashes and numbers from the textbox at the bottom. Then paste that string here.

To load a string, click on load and paste the string from your clipboard to the textbox at the bottom of the load string. Then click OK.

Here's a string I made up over 15 minutes or so. Rate it and post your own strings.

```
2---2---2---1---1---2---2---2-6-0---2---6-000---6-5-9-----------------------------------0---0--0--0--0--0---
2-2-7-7-7-8---1-0---0---c--------------------------------a------------------1---1---1---2-1---1---1---1---3-a------
------------------------
```
