Zunie.

Followed your instructions to no avail. The auto updates works fine, however same crash out error. Didn't crimson say something about the incorrect installer being the one connected to the server?

Also here is an interesting bug

When I tried to unistall renguard (1.01) it deleted my game.exe

not going to tragain as I don't feel like reinstalling maybe some1 else can confirm.

@the person who got the virus warning, you are getting that because the program is accessing the net, if you have your settings on too high then it detects it as virus like activity. The only other way is if you downloaded a version not from WWW,RENGUARD.COM even if your comp has a virus the file couldn't be infecte instantly upon getting to your computer

Out for the night, I need my beauty sleep lol

-Matthew
