The artillery shells which the UN found had nothing in them
THEY WERE EMTY.

No chemicals in them at all.

UN did not find any trace of chemicals.

Iraq did offer the scientists.

It was the US which refused. As then the truth about US fallacy will be out to the the world community.

No fly zones were never acceppted by iraq as result of their defeat in kuwaut.

Hence no fly zones are illegal iraq has every right to defend it's air space to which it never accepted. it was imposed on it by US.
