uh...WOL, down, was up for a few hours, went down again, came back, went down once more & hasn't come back to my knowledge.

traces EA hackers, lines them up, pulls out shotgun "you either stop DoSing WOL or you die, got it?!?!!"

er...idk what to say bout that ^^ except that that's what I feel like doing right now, if they left WOL alone I'd be ok with them DoSing, just not anything relating to WOL I miss WOL
