j\_ball430Happy Birthday, Dark.

BTW...my birthday is next Friday and I decided not to spring it on anyone because I expect LOTS of presents!

Here's my list:

250GB HDD  
New graphics card  
New sound card  
1024MB RAM  
New video card

that's just for starters Afterall, I do like to be suprised. Please, nothing under \$100.

That WOULD be awesome if I could get all of that, oh well, a Happy Birthday will do on the 30th.

LMAO ^^ In your dreams Jake you will never get anything better than me. LMAO Happy Birthday to anyone else who has a birthday today.
