Ok, RenGuard keeps crashing on me now, I got to copy the text it had in the box just before it crashed >>>

Warning. No WOL Name found. Connecting to WOL will probobly fail
Trying to connect to server #1...Connected
Connected to server.
Welcome to RenGuard !
To launch Renegade, please click 'Renegade'.

I have Renegade installed with the WOL components, I just reformatted my drive a few hours ago due to technical problems.
Any help would be greatly appreciated
