OH. MY. GOD.

That is, by FAR, the BEST barrel I have EVER seen in my ENTIRE life. Quite simply, it makes all other barrels look like worthless pieces of shit.

Jonathan, your barrel making abilities are unparalleled. From the first look, I fell in love. From its scratchy surface to its sexy flamable icon...it was second to none. No render in the world could improve upon it--it is like a beast in its raw, poorly rendered w3d format--crying out! Shoot me! Shoot me damnit!! Oh YESSSS!!!!!!
