Hiya.

sorry to drag this back nr the top again, thanks to all those who posted.

I was asking the question cause my HDD burned up and maybe 5 years worth of models, textures, maps, web-pages, tools etc burned up with it.

Couldnt afford a back-up device ( )

I will get round to making my own textures, but I need time to assemble them. I have googled lycosed and asked, but most of the stuff I had is gone.

I just thought a few other peeps might have some handy map building links as I am back to ground zero and any help is better than none!

thanx
