Subject: renguard thinks SS beta4 is a cheat!
Posted by IRON FART on Sat, 24 Apr 2004 06:17:19 GMT

The SS mod is a total conversion mod, so it uses it's own models and textures and settings. Obviously RG scans the mod and checks to see if it's legit. And it thinks that it is not simply because it uses different .w3d files and different texture files.

It just needs to be approved. Run Renegade without Renguard by double clicking game2.exe in your Renegade directory.

I think in the next version of RG, the installer should add 2 desktop shortcuts:

One to run Renegade with RG (game.exe), and another to run Renegade in normal mode.

Simple solution to problems such as these.
