I'm getting the message: "CRC Mismatch Error"

This error message means that game.exe and game2.exe are the same file. This may happen if you try to install with the installer and the safe installer. You may need to reinstall Renegade to replace the now-missing game.exe.

Your game2.exe is no longer there. You overwrote it with RenGuard too. RenGuard needs a real renegade-executable to launch.

Visit this thread <http://www.renegadeforums.com/viewtopic.php?t=9811> to download a replacement.
