FRAPS cuts your FPS down so far to get the good quality video, that you can't get that good footage you wanted to get on video anyway so its useless. Also, file sizes=HUGE like 4 gigs for 5 min video. Someone should make an program for renegade thats like the built in video creator on the half-life series, you dont lag witht hat at all you cant even tell its recording, you can record for 3 or 4 horus and still be no were near 4 gigs. lol blackhand.
