BlazerThat hotwire looks like she would freeze on the snow map I thought you said no skins?

Ive been 'promoting' all these maps that are on my site for over a half year now :S
At the moment i dont have any skins i took these screenies a long time ago - before RenGuard was released.

Its not that i dont like skins, its i dont like advantage skins such as neon-blue snipers and the (in my view a cheat) Clear Scope skin.

But if i have to choose between:

1) People having advantage skins like the sniper-clear-scope-cheat-skin,
neonblue sniperskins, neonblue stealth skins so that you see them earlier,
and skins like this.

2) Put RenGuard on in Pure mode disallowing any
skins and being sure that absolutely nobody has an unfair
advantage over the oters because they are maybe using the
skins i mentioned above.

Then i choose for option 2. I know most of you guys wont
use such skins but alot of others will and that is why i put
the server in Pure Mode. So that everyone who is joining
KNOWS for sure that everyone is using the same game-style
as they are and that it is practically impossible to have somesort
of (small/slight) advantage over them while playing.

I hope you realize nobody will play if you have the server set to pure mode. Anyone who is smart enough to download rengaurd has probably downloaded skins too.

I wonder why the FanMaps server is full every day, all day then
