DJMI heard a big bang, i managed to force the DVD drive open and thats all i found, a computer bloke is coming out on tuesday to have a look if the DVD drive is okay, I daren't use it till then because all the little bit s are inside, that and the fact that I can't open the damn thing

I've had that to, Not with my renegade disc though. it happend with my copied version of red alert 2. I played it a while, and then I heard a strange sound comming out of my computer, and red alert 2 crashed to desktop. I kicked against my computer cause of the damn strange sound, then my whole computer crashed and I got a black screen. then I Un-plugged the power cable. A while after that I've put my computer on again, and I opend my cd played, and my red alert 2 cd was Nearly into two pieces
