In the message box at the bottom of the program, what was the reason it gave for kicking you off? Did it say one of your files (such as game2.exe) is unauthorised? If it did, say what unauthorised file it is, and we can troubleshoot why it's coming up unauthorised and/or give you an authorised version.

It's strange that it'd decide something was unauthorised 7 minutes into a game instead of at the start (where it scans everything). Unless you are adding files during the game which it detects as unauthorised in it's next scan.

p.s. please re-size or remove your picture. It's pointless here and only serves to stretch the text and create a horizontal scrollbar at the bottom.
