bigejoe14Quote:If you had actually read the article, you would have seen this
"In 1957, Turkish air force pilots spotted a boat-shaped formation in Agri province. The government did not pursue the sighting, however. The entire area, including Mount Ararat, was off limits to foreigners because of Soviet complaints that explorers were U.S. spies. "
That dosen't mean it's "Noah's Ark". It could have been any ole' ark.

Corroborating with the Bible, that Ark DOES seem to be the fabled Noah's arc. In fact, this isn't new news, and yes, there have been surveys of the land, and yes, they DO have proof that a ship, (relatively measured to 300 cubits, the length issued by God to Noah for the Ark) which was obtained by a sonar shot into the ground. By reflecting off the metal remnants, the chassis of the ship was echoed back to the surface.
