rengay3Quote:Who has the MOST to lose from RenGuard?

Cheaters.

I'm not calling anyone a cheater, it is just a fact.

You also forgot. Other losers are: People with slow internet connections, People with certain firewalls, People with Windows 2000 and People who do not have administrator privlidges on their computer.

If u cant handle ur firewall dont use it!!
So if u dont know hot to use it, its useless!
