I can burn through 1,000 rounds in no time. 150 is untenable. You would never be in combat, you would have to make 20 pitstops.

I assume that you thinking about modifying the cannon on the Apache then. Considering both the Orca, and the Apache currently have unnoticeable differences in armament, you are planning on deleting the Hellfires from the Apache, upgrading with a DU cannon, and making the Orca dependent on the TOW missiles while deleting the Gatling gun?

I wouldn't mess with the armaments. Just make them refill for missiles, and compromise with 500 rounds chain gun ammo.
