AircraftkillerThe Orca can't carry a fucking GAU-8/A, the damn thing is bigger than a Volkswagen car! Only the A-10A is meant to be fitted with that cannon..

<http://www.cannis.net/commando/images/c4/orca1.jpg>

It does look like the Avenger, doesn't it?

Also the manual says the following:

"WEAPONS: 30mm chaingun/70mm rockets"
