Iv been reading some things around the net and watching some tv and there have been many people claming that the world will end come the year 2012. What is ur say in the matter? The mayan civilization's calender ended with the year 2012, alien ubduction victoms have been told of a revelation in humanity come the year 2012, people claim they have had vision of an angel tell them that all people will be sent into a gate (stargate if u will) that will send them though a worm hole into a galixy where humans will become part of a council of alien civilizations.

BTW: (definition) n. Ragnarok - the end of time.
