I banned YuTuS:80.218.122.227 today from the FanMaps servers.

Someone used an Exploit in WOL/Renegade to join as a moderator. He then banned everyone
from the bajaclan server with bajadera's nick.

I will not explain how this works to anyone!
Its also possible to use this exploit to join as "EA Network Administrator" etc for example, which
some of you may have seen before.

When i talked to bajadera about this he gave me the IP that was used to do this. I did a small
search on Black-Cell but that didnt turn up anything.
But once i started looking in my own server logs and the ones from FanMaps(0/1) i found that the
person who has this IP is YuTuS, a member of the !MoS! clan. I have put an IP ban on his
nickname.

I also explained to bajadera and synpro that they need to password protect their server mod nicks
in the same way as i am doing myself at the moment.

 I M P O R T A N T:

The MODS of FanMaps servers MUST read this and comply:

http://www.sourceofquality.nl/Forum/showth...=&threadid=1731

If you dont know how IRC works i suggest that you read my tutorial:

http://zunnie.hellrazer.net/irctut/irctut.htm

If you installed mIRC you can also join the server using these links:

irc://irc.n00bstories.com/FanMaps0
irc://home.n00bstories.com/FanMaps0
irc://irc.renstation.net/FanMaps0
(Just copy/paste one of the links into internet explorer, if one dont work, try other)

I will post more details soon.
