htmlgod Another thing about aircraft that might be worth fixing is the rockets - they go like 50 mph and have a turn radius like a skateboard. I think it would be worthwhile to make the rockets travel a lot faster...

Oh, and of course I suppose you haven't thought about overhauling the MRLS/MLRS yet?

Its missiles are so freaking slow, it's not even funny.

Having it to rotate it's turret would also be good.
