Subject: Image/Fileupload for your FTP/Website (update) + POTD Addon
Posted by Drift on Fri, 21 Mar 2003 20:16:09 GMT

Hey, that works pretty good!

Do you have anything that that limits the type of files that someone can upload? For security
purposes you wouldn't want anyone putting a .exe with that DIR's CMOD set to 777.
Might be something for the next version.
