Show-offs

Well, now there's another mod to add to the list of mods I will play. It looks great, even if I'm not convinced with the light tank model, but hey even the greatest of things have flaws.

Great synching with the music btw, I was especially impressed with the synching of cuts to Dominic's drumming.

One last thing, how the fuck does anyone mistake Muse for Sum 41, or are you purposely trying to insult Matt Belamy?
