Step 4: Once you've finished your work, it's time to save it. Go to file, and then "Save As". Your going to save this as a .DDS file. You'll be getting a save options window display giving you a lot of choices. Basically not much has to be changed, but on the 'Save Format' section, which is the very first one, choose No Alpha [DXT1].

Except instead of No Alpha DXT1, chose DXT5.
