---

AMD T-bird 1 gig, WD 30gig ATA 100, 512MB PC133 SDRAM, Win ME.

Ren map Load time 12-24 seconds, varies by map

AMD Athlon XP 2800+ Barton, WD 100gig, 512MB PC2700(running as 2100)DDR, Win XP

Ren map load time 5-10 seconds, varies by map

Numerous things will help how Ren runs and loads.

When I doubled the RAM on my T-bird system the game did run better and the frame rate went up because I had more system memory available to use for video.
