Well, look at it this way:

If you're on GDI, in Field, and someone attempts to nuke your barracks from behind, and you're just a mere engineer, and say this person is an LCG troop. That engineer has potentially unlimited life and C4. It just takes a quick "E --> 5" button combination to get totally healed.

I don't know about you, but unlimited C4 concerns me a bit more than someone whining about why they suck as a pilot.
