I'm not sure what's up with this.. Very often I'll be playing on a server and I will have an 0 bug like problem. I will shoot at a building and nothing will happen. I took screenshots, I'm shooting at the building and in both shots my points don't go up. And I know it not lag because my points don't go up by like 200 or whatever all of a sudden. Does this only happen to me?
