SuperFlyingEngiYeah, it usually gets hung up for me on Always.dat

It's a 200mb file, it takes some time to update. Just let it run.

That runtime error is from not installing it properly. You must install all the patches in the correct order.

.991 > .9915 > .992 > .9925

All of those patches can be found on this page, and if you keep having problems post here.
