I've got a problem with configuring Brenbot-135 for linux. When I start it i get this error:
BotMode must be either LFDS or WIN32!
This is what i have in mij brenbot.cfg:
BotMode = LFDS

i've also tried:
BotMode = "LFDS"
BotMode = lfds
BotMode = "lfds"

btw i don't have RedHat, i've got Debian 2.4, but the renegade server works well on it, i'm using the server for RedHat 7.3

I hope someone can help me
