[A-INastyDead]Reborn is sweet, and the maps are better.

WTF are you talking about? They have 3 maps that are just barely playable right now, and 2 of them they didn't even make.

TwA-Dan is going to make some decent maps for them now though.

Demolition manthe front where it grabs the shit has to be blue and the windows look like shit

Those arn't the windows, and we're trying to keep the team colors out of it as much as possible
