lol i freaked you out with my sig? You can get them at <http://www.danasoft.com>. I think they still let you make them...

Anyway, I don't know how to help you there. But about what Blazer said, I kind of changed it around ...

Blazer I am me

As for that Sig you are worried about, don't worry. It gathers the information your computer sends to EVERY website you visit to dynamically display your IP and browser type. Then it uses that information to hack your mind with the infamous m00hack and destroys it. Then you become The_Chaotic_One's mindless slave.
