a0000002a's IP address is: 4.60.13?.???
Resolved 4.60.13?.??? to Isanca1-ar13-4-60-13?-???.Isanca1.dsl-verizon.net

I matched the IP to a user in my database (n00bstories) who is one of the administrator/owners of Black Cell. Also anyone who is in #n00bstories often should recognize the host mask.
