Slash0xl don't know if this has been already stated somewhere, but do the mines have a limit? additional to the regular mine limit? or another way I am not thinking of...

^First post

RenxThe mines will also work different than the ones in Renegade, these mines will have a limit of around 50, and will not disappear when the limit has been reached, but instead it will prevent you from laying anymore. Thank NeoSaber for these excellent changes.
