deadaim00OMG!! How could i have leaked it, i wasnt even on the team. I had no way of getting the beta. O, and by the way, I took the mod down (after ramjet deleted it from the file database) I took it off my website. Sorry for the damage i have caused. Ill never do it again.

Either you'll never do it again because you wont 'help' any more mods, or you're just lying.
