deadaim00Im sorry i leaked the star wars mod. I feel really bad for doing it. I.... I just got mad, and i did something really stupid. Im sorry i did it. I really am. I actually feel bad. For real, no lies. And i will never put up any more betas, or stuff taht nobody else should see, only the creators. I will not leak any more mods/maps/anything else that happens to be not already released in the renegade community. Ive made myself out as an asshole. And i know its going to be a while before people realize that im not again. Htmlgod..... I am sorry. Everyone else who worked on the SW mod, I am sorry, Renegade community... I am sorry.

Now, please Crimson, lock this topic. I feel bad enough

It's just like "I killed a people and I can say sorry and go away."

Or the best way is: Just see what HTMLGOD says.

It's his option to forgive you or not.
