Master. kirbyo actuly i didnt click links and you posted the renalert link twice.....

why do you do things that you know will piss people off?

or do you just read subject and not even read post?

Yes, I read your incoherent babbling...

I could have read it and decided to post the two links to make fun of you, or I could have read the subject and part of your post and suggested the best mod that's currently out. Either way, your reply was completely uncalled for.
