1st screen with the rave shaw looks lik a wall hack.. but the only wall hacks i have seen for this game REMOVE the terrain...

so he is not cheating unless you can show me otherwise...

now the second screenshot shows a sakura in death animation
if you look closely you will see the havoc next to him has just fired a shot hence the puff of orangy smoke

get a clue
shit

and 20 FPS for that amount of players in a server is pratically normal not everyone has the 4GHz machine with an x800 XT with 3GB of RAM thats capable of running with 50+ on a 50 player server >_<
the thing thats shit is the KBPS... for 50 players.. pfft you should have around 250
